

## Company Overview

**London Genetics** is an expert in the use of pharmacogenetics in clinical drug discovery and development.

It works with London-based centres of excellence in genetic research to provide pharmacogenetic solutions.

### London Genetics can help companies:

- Partner with relevant academic and clinical genetics experts
- Apply genetic knowledge to de-risk clinical trials
- Design and manage projects
- Store, analyse and interpret study data
- Access comprehensive patient cohorts

Use our knowledge, experience and extensive networks to increase success in clinical development.

Pharmacogenetics will play a key role in the future of drug development and healthcare delivery, with the biopharmaceutical industry coming under increasing pressure for greater innovation, productivity and safety.

By providing companies with access to the combined genetics expertise and resources of its seven academic institution partners, London Genetics can help them meet these challenges. The company has broad expertise areas across a range of therapeutic areas. It is based at the Imperial College Incubator in London, UK.

The Company has an experienced Board chaired by Dr Barrie Ward and a Management team led by Dominique Kleyn. Chief Scientific Officer Dr Elizabeth Foot is joined by Clinical Director Professor Mark Caulfield, with Dr Roland Kozlowski and Professor Mike Spyer as non-executive directors.

**To learn more** about the exciting opportunities in this area and the potential benefits of working with **London Genetics** please contact us.

Launched with funding from the London Development Agency and in partnership with London's leading biomedical research facilities, medical schools and teaching hospitals, London Genetics unites and identifies core strengths and resources among its partner institutions:

- Imperial College London
- King's College London
- University College London
- Queen Mary, University of London
- St. George's, University of London
- London School of Hygiene and Tropical Medicine
- The Institute of Cancer Research

### Our Mission

To be the first-choice partner for companies seeking unique clinical resources, opinion and expertise in pharmacogenetics and for those seeking to add value to the development of new therapies and diagnostics through leading-edge research collaboration.
